

Prevalence of Esophageal Motility Disorders Among Patients Presenting with Dysphagia

Supplementary Table 1: Family history of participants according to manometry findings

Characteristics	Groups	
	Patients (n = 67)	Controls (n = 46)
DM	8.96	19.57
HTN	22.39	23.91
Stroke	0	0
Asthma	4.48	2.17
DM+HTN	11.94	6.52
DM+HTN+Asthma	2.99	2.17
DM+Achalasia	1.49	0
Asthma+Achalasia	1.49	0
HTN+Asthma	1.49	0
No family history	44.77	45.65

Note: All data are presented as percentage (%). Abbreviations: DM: diabetes mellitus, HTN: hypertension.

Supplementary Table 2: Swallowing difficulty characteristics among study participants

Symptoms	Groups	
	Patients (n = 67)	Controls (n = 46)
Difficulty in initiation swallowing	0 (0%)	0 (0%)
Difficulty after swallowing	67 (100%)	46 (100%)
